RECEIVED  
AUG 31 2009  
CHARTER SCHOOL OFFICE

**School(s)** Batesville High School and Batesville Junior High School

**Proposed Charter School Name:** Batesville Academy of Applied Technology

**Location:** Batesville Academy of Applied Technology will be located at the current Batesville Junior High and High School Campus. These two campuses are currently connected schools located at 1 Pioneer Drive.

**Grade Levels:** Grades 7-12

**Charter School Description:** The Batesville Academy of Applied Technology will provide an additional academic choice to parents and students in our area by transforming the classroom environment to one where teachers use research-based strategies and methods that engage students at deeper levels in hands-on, authentic interactive learning infused with technology. A variety of technologies will be used across the curriculum to both enrich and authenticate the learning experience as well as a means to provide students with the opportunity to gain expertise in using a wide variety of the most current technologies available. The charter includes four areas of emphasis including restructuring time, implementing a cross-curricular curriculum, implementing project/inquiry based learning, and creating a nurturing learning environment beyond the school day. Essentially, we want to foster a true partnership with the students, parents, and community. We want to enrich students' educational opportunities by providing them with learning experiences beyond the typical classroom walls.

Ted Hall, Superintendent Batesville School District
